

Announcement:

CharIN Focus Group Charging Communication worked out a detailed implementation guide for the charging communication feature “Plug and Charge” of ISO/IEC 15118 communication protocol.

Major goals of this document:

- » Provide a brief introduction to the e-Mobility market, its actors and their relation to ISO 15118 – 2:2014
- » Introduce the major concepts and used technologies of ISO 15118 – 2:2014
- » Ease the implementation of Plug&Charge in compliance with ISO 15118 – 2:2014 for all EV market participants with a more practical approach, by elaborating on the most crucial use cases
- » List the most prevailing implementation related requirements for both the ISO 15118 – 2:2014 protocol stack and the needed certificate exchanges

Table of contents

- 1 EV ecosystem
- 2 Communication protocol ISO 15118
- 3 System Components in ISO 15118
- 4 ISO 15118 and VDE Application Guide
- 5 Certificate Management with ISO 15118
- 6 Processes
- 7 Communication interface
- 8 Use cases
- 9 Requirements

Members of CharIN have full access to the document.
