

Grid Integration

2019-05-23 – Version 05

- There are many levels of Grid Integration that can generate value
- CCS with ISO/ISO 15118 is the key enabler of Grid Integration and is ready for V2G
- At the end of this year CharIN plans to host an Interop Event including V2G capable CCS vehicles and chargers
- While it could be some time before the wide adoption of V2G by consumers our goal is to have this technology platform available now for wide range of use cases
