

# High Power Charging for Commercial Vehicles

## Technological Readiness Level - extended

	Technology Levels
1	Observation and description of functional principle. Basic research.
2	Description of technological concept including application and feasibility study available.
3	Functional proof is available.
4	Validation in laboratory environment.
5	Validation in test setup under real operating conditions.
6	Demonstration and testing of complete system prototype under real operating conditions.
7	Functionality proof and operation of complete system prototype under real operating conditions.
8	Functionality proof of complete system under real operating conditions.
9	Qualification of the entire system based on successful operation.
