Biography

Lucien Mathieu is Transport & Emobility Analyst at the green transport NGO Transport & Environment (T&E), Europe’s leading clean transport campaign group. Lucien’s passion for electromobility goes back to his internship at Tesla in Amsterdam three years ago. Before that, Lucien studied multidisciplinary engineering at l’Ecole Centrale Lyon where he specialised in applied mathematics and business intelligence.

Lucien is part of T&E’s freight and clean vehicle teams, and his work is currently focused on accelerating the transition to electro-mobility for trucks, buses and cars with a strong focus on charging infrastructure. Lucien uses robust science-based evidence to promote sustainable transport policies at EU level with the objective to rapidly and effectively decarbonise Europe’s transport sector.
