Biography

Renske Schuitmaker is currently in charge of Public Affairs at Fastned. She is strongly driven to contribute to accelerating the energy transition, where policy is a major driver. In her current position she is working to reduce policy barriers and accelerate the development of policies stimulating the transition to electric driving and the roll-out of (fast) charging infrastructure.

Renske started her career at the International Energy Agency in Paris, where she was working in the transport team of the Energy, Technology and Policy division. She worked in particular on the topic of e-mobility, contributing to IEA analysis (the Global EV Outlook series) and EV policy initiatives (the Electric Vehicles Initiative). She also worked extensively to accelerate the energy transition in the international shipping sector, through IEA analysis and through engaging in international policy development processes.

Renske holds a Masters degree in Energy Science from Utrecht University.
